

HOSPITALITY LIGHTING

Create the Backdrop to the Extraordinary

Hospitality is the art of creating memorable experiences. Whether it's a family vacation, business trip, date night or spa day, lighting sets the scene for life's unforgettable moments. The right illumination welcomes guests into a lobby, makes tasks inside their room easier, inspires intimate dinner conversation and helps them relax during a much-needed massage. MaxLite offers a full suite of LED solutions designed to set the desired mood and enhance the guest experience.

Reduce Operational Costs by Increasing Efficiency

MaxLite LED lamps and luminaires offer a long life and energy efficiency. They are 70-80% more efficient than conventional light sources and can be combined with daylight harvesting controls and motion sensors for further energy savings. By replacing outdated lighting systems with more efficient technology, property managers can maintain, and even enhance, lighting levels using fewer lamps and lower wattages. But the money-saving benefits go beyond electricity costs; LED fixtures and lamps also require much less frequent maintenance. These gains in efficiency can lead to significant savings for businesses that operate 24/7, such as resorts, hotels, restaurants and gyms.

Influence Brand Perception

In today's competitive hospitality market, consumers judge properties not only on the amenities and services they provide. A company's commitment to sustainable practices increasingly factors into their decision of where to stay, dine, shop and relax. Choosing greener lighting alternatives can distinguish a brand and inspire consumer loyalty in a market filled with choices.

"The right lighting is absolutely essential to our stylists as they work on client's hair. The MaxLite BR lamps strike the perfect balance of delivering the bright, color-accurate lighting our stylists need, while looking modern and appealing to our clients."

-- Jennifer Parrotta Ciaglia
Co-Owner, Salon 518

"The upgraded lighting measures installed improved the light levels and quality of the light dramatically throughout the hotel. It also helped standardize the consistency and color of the lighting technologies, which in turn will assist with procurement and maintenance in the future."

-- Melanie Gately
Quality Conversation Services, Inc.

"Our client was very impressed with the uniform lighting the LED lightbars provided, and they thought it provided superior light to the four spot lights. The light has a smooth look to it versus the bright spotlights we were previously using, which had more of a sharp edge of light and burned really hot. They also couldn't believe how cool the LEDs were, even after being on for several hours."

-- Richard Antiporda
Vice President of Sales, Canterra Lighting

Utility Rebates Reduce Upfront Costs

While the long-term savings make LED the obvious choice over other lighting sources, utility rebate programs can reduce the overall cost of ownership. MaxLite offers many fixtures and lamps that are ENERGY STAR or DesignLights Consortium (DLC) qualified, making them eligible for nationwide rebate programs. We will work with you to transform the lighting in your buildings and facilities, while ensuring your upfront investment is paid back as quickly as possible. Our utility solutions team will even complete the rebate paperwork for you!

Why MaxLite?

MaxLite has more than 20 years of experience providing certified energy-efficient lighting solutions to the commercial building and residential markets. One of the first movers into LED technology in the industry, MaxLite offers an extensive line of state-of-the-art indoor and outdoor LED lamps and luminaires. We are a four-time recipient of the prestigious ENERGY STAR® Partner of the Year Award for our industry leadership and continue to be at the forefront of energy efficient technologies through the innovative research and development capabilities of our New Jersey headquarters and California facility.

MaxLite supports its products with the highest standards of quality assurance and customer support. We keep our products in stock and available for immediate purchase and delivery, shipping within the United State in one to three business days on standard orders. We are the lighting company that delivers certified quality LED solutions when you need them, and keeps delivering when you need us.
